

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-26 (cancelled)

Claim 27 (currently amended): An electronic scanning device, comprising
an image sensor for scanning an image;
a display that displays a first part of a scanned version of said image [[,]] ; and
a navigation sensor that detects relative movement between said scanning
device and a surface in close proximity to said navigation sensor whereby said relative
movement changes said display to displaying a second part of said scanned version of
said image.

Claim 28 (original): The electronic scanning device of claim 27 wherein said relative
movement may also move a cursor displayed on said display.

Claim 29 (previously presented): The electronic scanning device of claim 27 wherein
said second part of said scanned version of said image is scrolled in relation to said first
part of said scanned version of said image.

Claim 30 (previously presented): The electronic scanning device of claim 27 wherein
said second part of said scanned version of said image is panned in relation to said first
part of said scanned version of said image.

Claim 31 (original): The electronic scanning device of claim 27 wherein said second part of said scanned version of said image is displaced in two directions in relation to said first part of said scanned version of said image.

Claims 32-56 (cancelled)

Claim 57 (previously presented): A method of previewing a scanned image, said method comprising:

- displaying a first part of a scanned image;
- displaying a second part of said scanned image in response to relative movement between a scanning device and a surface in close proximity to said scanning device.

Claim 58 (previously presented): The method of claim 57 wherein said second part of said scanned image is scrolled in relation to said first part of said scanned image.

Claim 59 (previously presented): The method of claim 57 wherein said second part of said scanned image is panned in relation to said first part of said scanned image.

Claim 60 (previously presented): The method of claim 57 wherein said second part of said scanned image is displaced in two directions in relation to said first part of said scanned image.

Claim 61 (previously presented): An electronic device comprising:

- a display located on a first side of said electronic device;
- a navigation sensor located on a second side of said electronic device, said second side being opposite said first side, wherein said navigation sensor detects movement of a part of a user relative to said navigation sensor located in close proximity to said navigation sensor, and wherein an image displayed on said display is

altered in response to said movement of said part of said user relative to said navigation device.

Claim 62 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by moving an image of a cursor.

Claim 63 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by panning a second image displayed on at least part of said display.

Claim 64 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by scrolling a second image displayed on at least part of said display.

Claim 65 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by showing a different part of a second image, at least part of which is displayed on at least part of said display.

Claim 66 (previously presented): The electronic device of claim 61 further comprising:
a first button, whereby said movement of said part of said user and said first button may be operated in cooperation to mimic at least one function of a computer mouse being used with a graphical user interface.

Claim 67 (previously presented): The electronic device of claim 66 wherein a graphical user interface is being displayed on said display.

Claim 68 (previously presented): The electronic device of claim 66 further comprising:
a second button, whereby said movement of said part of said user, said first button, and said second button may be operated in cooperation to mimic more than one function of a computer mouse being used with a graphical user interface.

Claim 69 (previously presented): The electronic device of claim 68 wherein a graphical user interface is being displayed on said display.
